**Intellectual Property Prospector** identifies companies with total assets of any size filing for bankruptcy or reporting other financial difficulty and profiles their ownership of intellectual property. The Prospector features companies that meet strictly defined, predetermined criteria and is designed to support the efforts of firms and individuals interested in identifying opportunities in the specific area of intellectual property, which includes patents, trademarks, trade secrets, and licenses, among others. Information is compiled weekly and the Prospector is distributed by email every Sunday evening to arrive before 9:00AM every Monday. The Prospector is published by Beard Group, Inc. (<http://BeardGroup.com>). For subscription information call Customer Service at 240-629-3300, ext. 27.

### **Prospector Profile Selection Criteria:**

In order to appear in the **Intellectual Property Prospector**, a company must report ownership of intellectual property assets, as well as one of the conditions listed below:

- An event which indicates financial distress; e.g., default, distressed exchange offer, preferred dividend omission, debt at deep discount, restructuring, low rating, audit concerns, covenant problems, and loss/deficit.
- Chapter 11, 7, or 15 bankruptcy filing
- Section 363 Sales

**DISCLAIMER:** The conditions for inclusion in the Prospector are selected by the editors, because, in their opinion, the occurrence of such an event or the existence of such a circumstance is a likely indicator of current or prospective financial or operating difficulty. There are, however, other reasons why such facts or circumstances may exist. The inclusion of a profile suggests the possibility of financial distress or the possibility that the company may be of interest to firms and individuals interested in identifying intellectual property for some other reason. *Inclusion should not be construed to represent analysis of the condition of the company or its intellectual property or a definitive determination that the company is in difficulty.*

**ACCURACY & COVERAGE:** The information contained herein is obtained from sources believed to be reliable. However, the accuracy of most data cannot be verified prior to publication, and the information is not guaranteed. Desired information is often incomplete, inaccurate, delayed or unavailable. Do not rely on the Prospector without independent verification.

**SUBSCRIPTIONS:** Subscription rate: \$575 for six months, payable in advance. All subscriptions entered are continued until canceled. For subscription information call Customer Service at (240) 629-3300, ext. 27.

**Event:** Dohan and Company, P.A. raised substantial doubt about the ability of Clyvia, Inc. to continue as a going concern after auditing its financial statements due to its accumulated loss of \$8,169,570 from December 21, 2004 to January 31, 2006.

**Intellectual Property:** In April, 2006, the German Patent and Trademark Office (GPTO) granted Clyvia GmbH a patent for modifications to the Fuel Technology process of Clyvia GmbH's own design. The process designed by Clyvia GmbH involves pre-heating the input raw materials until they reach a liquid or pulpy consistency. Once the raw materials reach the desired consistency, they are pressure injected into a reactor mechanism that has been heated to vaporization temperatures. During the reactor phase, water and other vaporizable materials are removed for further processing. A scrubber device within the reactor cleans the inner surface by rotating a steel brush over it. This removes carbon deposits from the inner surface of the reactor which are then removed and transferred to the bituminous waste at the bottom. [SEC Filing 10-KSB 05-16-07]

**Event:** Deloitte & Touche LLP notes that Energy Exploration Technologies, Inc. incurred a loss of \$3,767,458 and the net cash used in operating activities was \$992,997 for the year ended December 31, 2006. It also had an accumulated deficit at December 31, 2006 of \$37,642,094. The auditor states that the Company's ability to continue as a going concern is dependent upon the ability to generate profitable operations and obtain the additional financing to meet obligations and repay liabilities arising from normal business operations when they come due.

**Intellectual Property:** The Company has no immediate intentions of obtaining a patent for its Stress Field Detection (SFD) technology as the risk and cost of seeking a patent exceed the benefits of a patent. The patent protection process would require disclosure of the SFD technology to third parties and ultimately public disclosure. This disclosure could significantly increase the risk of unlawful use of its technology by third parties. The Company enjoys common and contract law protection of its technology and trade secrets. Its strongest protection of the SFD technology comes from restricting access to knowledge of the technology. [SEC Filing 20-F 06-20-07]

**Description:** The Company provides airborne geophysical services to its clients through the use of its leading edge SFD Survey System.

It also has strained liquidity with \$270,000 in total current assets available to pay \$384,000 in total current liabilities.

**Intellectual Property:** The Company has several proprietary aspects to its software that makes its products unique and desirable in the marketplace. The Company attempts to protect them by relying on trademark, service mark, trade dress, copyright and trade secret laws, and restrictions on disclosure and transferring of title. In addition, the compiled software code that it offers makes it difficult to use the source code to create other similar programs. The Company maintains the enterprise software code on dedicated servers in its Albuquerque data center, which provides better protection and security of its products. The Company has entered into confidentiality and non-disclosure agreements with employees and contractors in order to limit access to, and disclosure of, proprietary information. **Category:** Restructuring

**Event:** Remy International, Inc. announced that it has reached an agreement with the majority of its unsecured debt holders to undertake a capital restructuring through a prepackaged plan of reorganization. The Company is in the process of obtaining debtor-in-possession financing and a \$330 million senior secured exit credit facility, which would be effective upon execution of the reorganization plan.

**Intellectual Property:** General Motors granted the Company an exclusive license to use the “Delco Remy” trademark on and in connection with automotive starters and heavy-duty starters and alternators until July 31, 2004, extendable indefinitely at the Company's option upon payment of a fixed \$0.1 million annual licensing fee to GM. The Company had also been granted a perpetual, royalty-free license to use the “Remy” trademark. The “Delco Remy” and “Remy” trademarks are registered in the United States, Canada and Mexico and in most major markets worldwide. As part of the Company's acquisition of Delphi Corporation's light duty alternator business, the Company and Delphi Technologies, Inc. entered into a license agreement dated November 30, 2002, by which it licensed from Delphi Technologies certain patents and technical information used in the manufacture and remanufacture of belt-driven automotive generators and alternators.
